PRESS RELEASE

Sundance Golf Club Redesigns Hole

DAYTON, MN – (November 2009) – Sundance Golf & Bowl Inc. has completed a redesign of their 16th hole. The new redesign project was initiated to resolve ongoing drainage issues due to an existing faulty drain pipe.

The project, thanks to Greenseth Golf, included connecting two existing ponds with a naturally landscaped triple tiered creek that allows overflow to drain off the course.

All redesign work has been completed and normal play, outside newly seeded areas, will resume in the spring of 2010.
