PRESS RELEASE

Sundance Golf & Bowl Remodels Bowling Center

DAYTON, MN – (August 2008) – Sundance Golf & Bowl has done away with the “old school” hardwood lanes and has installed new AMF SPL Synthetic lanes and also updated their scoring/reporting system with the AMF BES program.

All 24 lanes consisting of Maple wood have been tore up and replaced with the new SPL lanes which will provide increased wear resistance, lower maintenance costs, a warm natural cosmetic appearance and the “Brush Finish” technology which will allow for a more consistent roll and higher scores.

In addition, Sundance replaced their scoring system with AMF’s BES program that features 37” LCD scoring monitors and a state-of-the-art interactive scoring system that is easy to use and entertains at the customer level and provides unlimited reporting and business functions at the back office level.

All construction work has been completed and all 24 lanes are currently accommodating leagues, open bowling, birthday & group parties and special events. For more information, please visit www.SundanceGolfBowl.com
