Sundance Golf & Bowl, Inc. Pump House Vandalized

DAYTON, MN – (December 2007) – The Sundance pump house located off the first fairway of Sundance Golf Club was reported vandalized last month.

Eyewitnesses reported they saw a handful of Sundance employees having an “axe swinging party”.

Originally built in the Dooms-Day Era and once considered a modern marvel, the structure withstood the test of time, including tornados, golf ball hailstorms & numerous verbal attacks. The reasoning behind this act of destruction is still not fully known, but experts speculate that ownership may be involved. Anonymous sources indicate that ownership would prefer to have a fully functional building that would repel water and no longer loom the fear of collapse at any given lean.

An unofficial investigation is being conducted and construction of a new and less historic pump house is underway.
